## HEALTH CARE FOR THE *whole* BODY

## DESIGNED FOR *every* BODY

# Who We Are

Blue Mountain Women's Clinic was founded in 1977, as a feminist-based clinic to address the lack of access to abortion care in Montana. In 1991, Blue Mountain Women's Clinic evolved into Blue Mountain Clinic Family Practice, and we expanded services to include primary care for the entire family; men, women, children, and everyone in between. Blue Mountain Clinic exists because our community created us, and we remain because our community continues to support and shape who we are. Our health care philosophy is formed by the belief that reproductive health should not be separated from, but rather integrated into, every day family medicine.

We are honored to have been a part of so many people's lives through medicine, education, and advocacy for almost 40 years. As we witness diminishing access to personalized primary, and reproductive care, our patient numbers continue to grow. Blue Mountain Clinic is called upon daily by those who need care for their families at an ever increasing rate. This year, we put the finishing touches on our 2016-2019 strategic plan. Out of this, came a genuine understanding that in order to remain true to our mission it is more important than ever that we continue to find creative solutions that accommodate this ever increasing need. We cannot put into words the gratitude that we have for the continued support we receive from our community and we hope you will continue to stand in solidarity with us as we move through the next phase of our organization's evolution!

Annie Hasen  
Executive Director

Dear Friends and Supporters,  
As I begin my 17th year as Medical Director of Blue Mountain Clinic, I continue to have an energetic, forward thinking enthusiasm for coming to work. As I begin my 39th year as a Family Physician I continue to be amazed at how much I continue to learn and want to be a part of my patient's health care. This is my last job and I don't plan on it ending soon. My father is going to be 90 next year and he is still teaching in the 68th year of his career. I would like to emulate that! With my experience at the helm and with outstanding clinicians and support staff unique in my career, Blue Mountain Clinic will continue to thrive as long as we have friends and supporters like you.

Eric A. Ravitz DO FAAFP  
Medical Director

Access Fund Created to help women who couldn't afford abortions

BMWC moved to 715 Kensington, Missoula, MT

First All Women's Run-continued for 24 years.

## Electronic Health Records

The implementation of EHR allow us to provide:

- Streamlined and integrated communication with other clinicians
- Secure patient portal to access health records, pay bills and submit paperwork.
- Secure access for our clinicians to updated medication lists and medical information.
- Improved Triage system allowing efficient follow-up and reminders for patients and clinicians.
